Subject: Arbor hill - nightmare for our township - bad order at northville high school Saturday 730 am

As I took my 10 year old to his basketball game I was treated by horrible odor from land fill in woods of edenderry subdivision and northville high school. This is a huge concern for our quality of life and our health.

We will be organizing our neighbors who are now affected by the landfill directly for the first time since I moved here 7 years ago. If we are affected over 2 1/2 miles away then I just can't imagine what my closer township residents are dealing with including the hundreds of children at ridgewood elementary.

Something has changed. Maybe it is the vertical expansion that has made the landfill peak way above the tree lines. Maybe it is miss management or poor odor control. Regardless we will be activity involved moving forward.

Sincerely concerned,

Subject: Arbor Hills Landfill

Good evening,

I would like to report odor coming from the Arbor Hills Landfill. I just went out to my car at 8:30 pm and the odor was so bad I had to come back in for a scarf around my face. It's a gaseous odor not a garbage can type of odor. Please advise why this smell is happening so strongly. I have cancer and am currently undergoing chemotherapy. I have headaches from the chemo and if I stand outside and smell the odor it makes the headaches worse, therefore the landfill is causing me to cover my face anytime I am outside when the odor is present, which is often. I used to report odors often (over 20 complaints at least) but felt as if I was not getting anywhere. Since my cancer diagnosis this fall (no family history, is it possible that there's something from the landfill?) I have not had the energy to report the odor but have smelled it time and time again. Please advise the cause for such an interruptive and unpleasant odor this evening.

Thank you.

Arbor hills landfill

Dear Mr. Miller -

Tonight since 5pm I have smelled a stench coming from the Arbor Hills Dump. Its a smelly rotten egg smell. It has been really bad over the last few weeks. I live in Steeplechase of Northville on Starlite run. It seems whenever the wind is blowing from southwest to northeast I can smell it.

Anthony - I live in Steeplechase in Northville Township. I was taking a walk around the neighborhood near my home around 9pm this evening and could smell the sulfur/rotten egg smell from the Arbor Hills Landfill. I also noticed this smell yesterday during the day as I was putting up christmas lights on my home as I had the day off from work. Both yesterday and today I called the I called the Arbor Hills odor hotline 248-305-8432 and left a message about the smell and left my phone number (no one has called back yet). These odors from the Landfill occur several times every week. I am trying to be more diligent in reporting these odors now. It is a terrible inconvenience living near the Arbor Hills Landfill and something should be done to stop these constant odors

Subject: Arbor Hills Landfill

Hi,

I live in the Steeplechase neighborhood and I'm emailing to report odor from Arbor Hills Landfill. The first I smelled it was 4 pm today and continued to smell it when I arrived back home at 8:30 pm. The smell is strong sulfur, which was stronger at 8:30 pm than at 4 pm. The frequency of smells (days I have reported) seem to be increasing as time goes on. This is my first email, but I have called the last several times I have smelled it.

I will leave contact info below.

Thank you.

Subject: Landfill odor from Arbor Hills pollutes the air again
Attachments: Odor Survey Form (1) - Dec 5 2016.docx

Arbor hills is polluting the air this evening with a very strong, pungent smell this evening. It's been going on for more than a couple of hours this evening. It is so strong that I could smell it nearly 6 miles away from my home, at Hillside Middle School this evening.

I appreciate the continued vigilance from the EPA and DEQ. I hope you can get the facility to get their operations under control soon and stop poisoning me and my family. It's a shame that this facility has been allowed to operate like this for so many years. Please do NOT let them expand any further.

Please see the DEQ odor complaint form for your reference.

Odor Report - Stop The Arbor Hill Land Fill

Mr. Miller/Elected Officials,

Tonight at around 6:30 pm, we smelled a terrible stench coming from Arbor Hills Dump at Non-ResponsiveNon-Responsive.

It smelt like rotten eggs and has been very caustic, and has been getting bad to worse.

We would appreciate it if we look into it and provide us some solution via the EPA and other local enforcement agencies.

Concerned resident.

Thanks for your support.

Subject: RE: Arbor Hills Landfill Salem Township Michigan is smelling

I drove through the western end of Northville Township this morning (Saturday Dec. 3, 2016) after receiving numerous odor complaints. I was out between 9:30 and 10:30 AM.

NOTE: Addresses in this report do not represent people who complained; they are intended to locate the points of odor.

The smell at Northville Ridge sub was eye-watering in front of Non-Responsive (just south of Six Mile).

There was medium odor at Ridgewood School, in Arcadia Ridge Non-Responsive) and in Northville Hills Non-ResponsiveNon-Responsive.)

There was light odor in the Northville High School parking lot and at Six Mile and Beck, and at Six Mile and Ridge.
I did not find odors in the Edenderrys, the Crestwoods, Shadbrook, Woodlands North, Steeplechase or Stonewater subdivisions.

At Arbor Hills, I met with Bob Walls, the general manager. We drove the neighborhoods together around 11AM, and most of the odors had dissipated. I did still smell it at Arcadia Ridge, Mr. Walls could not smell it.
At the dump he showed me the only operating site, on the western face of the hill. Garbage odor was strong.

While the weather apps on our cell phones showed wind from the west or southwest, it appeared to be blowing from the south. I would guess the wind was swirling around up on top of the hill.

Mr. Walls is going to investigate the load log from this morning, and see if anything particularly odorous was taken in.

Fred Shadko, P.E.
Northville Township Trustee

Subject: RE: Arbor Hills Odor monitoring

Good evening,

As the odors continue, the Northville residents insist on actions to be taken against Arbor Hills. We have lived in misery for the past 11 months where the horrid smells are consistent. This is not a quality of life. This pollution is effecting our lives in many ways, like enjoying the outdoors, having good health, our home values and nothing is being done.

Arbor Hills has had many reasons to accrue more than 4 violations.

We feel they are not being monitored properly.

Your help is greatly appreciated:)

Subject: Re: Continued Odor at Arbor Hills

Hi Larry,

Thank you so much for responding to this. I learned today that the MDEQ has not issued any fines to any of the companies operating at Arbor Hills Landfill. How can that be? What are the repercussions for polluting the air we breathe and negatively affecting our quality of life?

The EPA confirmed they have not issued any fines, either.

With nearly 450 odor complaints this year alone, why is it that Arbor Hills has only received four violations from MDEQ? What would it take for them to receive another violation? What would it take for MDEQ to fine them?

Do you, or anyone else on this thread, have any additional information regarding the Great Lakes Recycling fire? The manager of the facility confirmed they were handling plastics for some time. Did they follow proper protocol to manage plastics? Was this the facility that manages recycling for Arbor Hills, or was it a drop-off facility separate from Arbor Hills?

Can anyone confirm who is paying for the 1 million gallons of water taken from Plymouth and Northville townships that were used to extinguish the fire?

Best regards,
Non-Responsive

I am writing to report more landfill odor at our house on **Non-Responsive** this evening. I noticed it when I came home from work at 4:30 pm, and foolishly left the garage door open. The garage is now full of the smell. I will report this violation through the Odor Complaint Hotline, as directed after my initial email on 10/29. I am copying all of you simple to let you know that the problem continues. I ask that my complaint be noted, again, in connection with Advanced Disposal's continued desire to site a new landfill to the north of Arbor Hills and directly on the western edge of our community.

Subject: RE: Fire at Arbor Hills

I am writing to report a fire at the Arbor Hills facility this evening. It began over 7 hours ago and appeared to still be burning when I returned home shortly after 10 pm. My wife and neighbors reported black smoke billowing out of the facility for many hours today. Fortunately for us the winds were not blowing in our direction. Communities to the south of Arbor Hills were not so fortunate.

I'm also told that Salem Township has no hydrant system to suppress fires at Arbor Hills. Apparently, firefighters were forced to siphon water from Plymouth and Northville Townships to battle this event. How is it possible that Salem can site a landfill – the state's largest – on the border of our community yet not devote sufficient resources to protect itself or its neighbors against the clear and present hazards created by that facility?

I am copying all of you, again, to make it clear that the problems with this facility continue. I request that this complaint – my third in under one month's time – be noted in connection with Advanced Disposal's utterly incomprehensible desire to site a new landfill to the north of Arbor Hills and directly on the western edge of our community. The significant problems experienced by residents in the surrounding neighborhoods over the

past 12 months are well documented by now. The frequency with which those problems continue, and the failure of officials in Salem Township and Washtenaw County to address them, is very troubling.

Subject: RE: Continued Arbor Hills Landfill Odor

I am writing to report more landfill odor at our house on Non-Responsive in Stonewater this evening. The odor began sometime before 7:45 pm and was still strong around the perimeter of my residence at 8:45 pm (the last time I was outside). I have reported this violation through the Odor Complaint Hotline, as directed after my email on 10/29. I am copying all of you simple to let you know that the problem continues. I request that my complaint be noted, again, in connection with Advanced Disposal's continued desire to site a new landfill to the north of Arbor Hills and directly on the western edge of our community.

Subject: Continued Arbor Hills Landfill Odor

Writing to report landfill odor at our house on Parkshore Drive in Stonewater this afternoon. I thought we had largely resolved this issue during our prolonged battle with Arbor Hills last December through this past March. Apparently, the mismanagement and public health / nuisance issues continue at this facility.

I request that my complaint be noted specifically in connection with Advanced Disposal's continued (and inexplicable) efforts to site a new landfill to the north of Arbor Hills and directly on the western edge of our community.

Best regards,

Re smell 12/5/16

Good evening,

As we come home from work we are greeted with this nasty rotten egg smell this evening around 6pm.

This has been an ongoing situation and no one seems to put a stop to it.

This is not quality of life.

This is unfair.

Please put a stop to this horrible air pollution.

Thank you for your time.

Subject: Strong dump odors at Northville Highschool

Good Afternoon

This morning prior to our kids basketball game at northville high school there was a strong odor that smells just like the dump at 5/Napier. It is concerning that the odors (which are in fact chemical trails) are now polluting the entire township. What are we breathing? What health risks are we increasingly being exposed to?

This is totally unacceptable.

Hello all,

We live in the Steeplechase subdivision in Northville, MI. Since 6:15pm, I have smelled the dump throughout the subdivision. At 8:41pm, I could smell it at ridge and 6 mile all the way into Steeplechase. It started out early evening as a sweet rotting smell, about a 7 out of 10 in odor intensity. As the evening progressed, it turned into a gas smell and it's nauseating. 8 out of 10 in intensity.

Please file this under your official complaints and stop Arbor hills from expanding. They are mismanaging the current dump and our health has been comprised since last year when there were major problems w gas collection. It has not resolved. At. All.
